Piazza Beato Pio Campidelli 4,
San Mauro Pascoli

LANGUAGES

Italian: Native
English: C1-Cambridge CAE
(Obtained on 17/06/2023)

SOFT SKILLS

- Teamwork**
Developed through years of scouting activity
- Organisation**
Managing university, work and competitive sport simultaneously
- Communication**
High-school student council representative
- Problem solving**
Applied daily in software development and academic projects
- Determination**
Competitive sports practice

TECHNICAL SKILLS

- Programming languages**
C, C#, Python, JavaScript, Java
- Databases**
T-SQL, MySQL, PostgreSQL
- Frameworks**
.NET, Blazor, Node.js, HTML5, CSS3
- DevOps**
Docker, AWS, Git
- OS**
Windows, Linux

WORK EXPERIENCE

- Freelance Software Developer**
Self-employed | Mar 2025 – Present
 - Development of custom software solutions for business clients
 - Digitalization and automation of business processes
 - Requirements analysis and ongoing support for system evolution
- IT Specialist - Neri S.p.A.**
Longiano | May 2023 – Jun 2023
 - Business process automation and network infrastructure management
 - Technical support and training for company employees

PROFILE

Second-year Computer Science and Engineering student at the University of Bologna, with professional experience as a freelance software developer since March 2025. Designed and built a full-stack shift management platform for an Italian private clinic network, delivering measurable improvements to healthcare operations. Driven by a genuine interest in software architecture and process optimisation, with a strong academic foundation and a proven ability to deliver complex projects.

EDUCATION

- Bachelor's Degree in Computer Science and Engineering**
University of Bologna | Sep 2024 – Present
 - Software development, algorithms, databases and web technologies
 - Notable results: OOP project 30L, Algorithms and Data Structures 30/30, Introduction to Programming 30/30
- Diploma in Computer Science and Telecommunications**
ITT Blaise Pascal, Cesena | Sep 2019 – Jul 2024
Final grade: 97/100
 - Software & web development, databases, networking infrastructure

PROJECTS

- Hospital Shift Management System**
Freelance - .NET Blazor, C#, SQL, | Mar 2025-Present
 - Web application for managing the complete shift lifecycle in a private clinic network
 - Features: shift creation and scheduling, digital time-stamping, multi-level approval workflow, and manager dashboards
 - Used by both freelance medical staff and permanent hospital managers
- Crossy Road - OOP Recreation**
University of Bologna - Academic project | 2024-2025
 - Faithful recreation of the mobile game Crossy Road applying object-oriented design principles
 - Final evaluation: 30L
- Classmate - Backend**
High School Project - Node.js, Docker, REST API | 2023-2024
 - RESTful API backend for a school-oriented social platform allowing students to upload and share lesson notes
 - Designed and implemented the full backend architecture, containerised with Docker for portability
